

The PEARL Archive of Vacuum Tube, Loudspeaker & Solid State Audio Technology

Updated approximately monthly; this is Ver. 1.10, May 1, 2014.

To obtain the most recent version of this document [click here](#)

Click on *blue text* in the Volume/Section listings to be taken directly to the web page where the articles can be downloaded.

THE FOLLOWING IS A COMPLETE INDEX of the articles contained in the PEARL Archive of Vacuum Tube, Loudspeaker and Solid State Audio Technology.

Presently spanning 16 volumes that cover a wide range of topics, the 'Archive is a collection of approximately 1,200 articles that chronicle the implementation of vacuum tubes in the audio-reproduction chain from the late 1920s through to the present day.

While we might at some point make the entire collection available on DVD, the scanning, page-by-page reconstruction and conversion to OCR-d PDF of at least 5,000 pages is a very time consuming project that will not be completed for some time.

In the meantime articles can be downloaded individually and as Section and/or Volume compilations.

Because it will take some three years at least to process and upload the entire Archive, we will update this document as we go.

Titles of presently downloadable articles are shown in *blue text*, clicking on which will take you to the relevant page on our site.

This latest release is expanded from the original intent back in the late 1980s to provide an extensive archive of only vacuum tube technology as implemented in audio to include the very large amount of information amassed up the present; early 2014.

VOLUME 1: POWER AMPLIFIERS

VOLUME 1: COMPILATION DOWNLOAD — 57 ARTICLES

505 Pgs.

SECTION 1: AMPLIFIER BASICS — 16 ARTICLES

001	Volume 1; Section 1 — Compilation download		81 Pgs.
002	Puzzled About Amplifiers?	Norman H. Crowhurst	4 Pgs.
003	Amplifiers	Edgar M. Villchur	6 Pgs.
005	High-Power Audio Amplifiers	M. Horowitz	4 Pgs.
010	Push Pull in Hi Fi	M. Horowitz	4 Pgs.
015	Simplified Push-pull Theory—Parts 1 & 2	Julius Postal	8 Pgs.
020	Push-pull Audio Frequency Amplifiers	K. R. Sturley	6 Pgs.
025	Circuit Features of High Fidelity Power Amplifiers	Robert F. Scott	3 Pgs.
030	Circuit Features in Hi-Fi Power Amplifiers	Robert F. Scott	3 Pgs.
035	Why Do Amps Sound Different?	Norman H. Crowhurst	3 Pgs.
040	High-Power vs. Low-Power Amps	Norman H. Crowhurst	4 Pgs.
044	Adequate Audio Power in the Home	James Moir	5 Pgs.
045	Audio Power Requirements and Statistics	C. Nicholas Pryor	3 Pgs.
050	Energy Distribution in Music	John P. Overly	4 Pgs.

055	Audio Designer's Handbook—Parts 1 & 2	David Saslaw	11 Pgs.
060	Thoughts on Amplifier Design	Stewart Hegeman	2 Pgs.
065	System Design Factors for Audio Amps	M. V. Kiebert	16 Pgs.

SECTION 2: ULTRA-LINEAR AMPLIFIERS — 24 ARTICLES

070	<i>Volume 1; Section 2 — Compilation download</i>		315 Pgs.
071	UK and US Ultra-linear Predecessor Patents	Alan Dower Blumlein	9 Pgs.
072	Keroes Basic Output Transformer Patent	H. Keroes	5 Pgs.
073	Keroes and Hafler Ultra-linear Amplifier Patent	H. Keroes & D. Hafler	5 Pgs.
074	Keroes Ultra-linear Transformer Patent	H. Keroes	5 Pgs.
075	An Ultra-linear Amplifier	H. Keroes & D. Hafler	3 Pgs.
076	David Hafler Ultra-linear Amplifier Patent	David Hafler	5 Pgs.
080	Ultra-linear Amplifiers: Parts 1 thru 3	Fritz Langford-Smith	15 Pgs.
081	Ultra-linear Amplifiers: Parts 1 thru 3 with References	Fritz Langford-Smith, et al.	68 Pgs.
085	Ultra-linear Amplifiers	Wireless Engineer	2 Pgs.
086	The Ultra-linear Power Amplifier	Rudolf Moers	52 Pgs.
087	Optimized Electron Stream Web Pages	Dennis Grimwood	105 Pgs.
090	Tetrodes with Screen Feedback	Author Unknown	3 Pgs.
095	Amplifiers and Superlatives	D. T. Williamson & P. Walker	5 Pgs.
100	Determining Screen Grid Dissipation in Ultra-linear Amps.	Leonard Kaplan	2 Pgs.
105	Ultra-linear Operation of the Williamson Amplifier	D Hafler & H. Keroes	3 Pgs.
115	Designing an Ultra-linear Amplifier	Edward S. Miller	2 Pgs.
125	High-Quality Circuits	John K. Frieborn	3 Pgs.
135	Adapting the Ultra-linear Williamson to 6550 Operation	Herbert I. Keroes	4 Pgs.
140	A 50 Watt Power Amplifier	David Hafler	5 Pgs.
145	120 Watts of Hi-Fi Power	David Hafler	3 Pgs.
150	U. L. Operation of 6V6 Tubes	David Hafler	4 Pgs.
155	New 25 Watt Power Amplifier	Norman Kramer	2 Pgs.
160	A 60 Watt Ultra-linear Amplifier	Author Unknown	4 Pgs.
165	The Ultra-linear II	Author Unknown	2 Pgs.
170	40 or 60 Watt Hi-Fi Amp with Tertiary Feedback	Thomas F. Burroughs	4 Pgs.

SECTION 3: THE MCINTOSH UNITY-COUPLED AMPLIFIER — 15 ARTICLES

171	<i>Volume 1; Section 3 — Compilation download; article 205 excluded</i>		77 Pgs.
175	Description & Analysis of a New 50 Watt Amplifier Circuit	F. McIntosh & G. Gow	5 Pgs.
180	A New 30 Watt Power Amplifier	S. Corderman & F. McIntosh	6 Pgs.
181	Wideband Amp Coupling Circuits — US Patent; 12-1949	Frank H. McIntosh	12 Pgs.
182	Wideband Transformer — US Patent; 12-1949	Frank H. McIntosh	9 Pgs.
183	Wideband Amplifier — US Patent; 06-1949	Frank H. McIntosh	7 Pgs.
184	Amplifiers — US Patent; 05-1953	Frank H. McIntosh	7 Pgs.
185	Making Electron Discharge Devices — US Patent; 10-1943	Frank H. McIntosh	9 Pgs.
186	Dome Loudspeaker — US Patent; 01-1975	Frank H. McIntosh	5 Pgs.
187	Compilation of Frank H. McIntosh US Patents	Frank H. McIntosh	49 Pgs.
189	Realistic Audio Engineering Philosophy	Norman H. Crowhurst	11 Pgs.
190	Hi-Fi at Low Cost with Twin-Coupled Amplifier	Norman H. Crowhurst	6 Pgs.
195	Radio Electronics Twin Coupled Amplifier	Norman H. Crowhurst	6 Pgs.
200	Updating the R-E Twin-Coupled Amplifier	Norman H. Crowhurst	3 Pgs.
205	High Efficiency, High Quality AF Power Amplifier	Alexander B. Bereskin	13 Pgs.
206	High Efficiency, High Quality AF Power Amplifier — w/Refs	Alexander B. Bereskin et al.	40 Pgs.

SECTION 4: TRIODE-CONNECTED TETRODES — 4 ARTICLES

207	<i>Volume 1; Section 4 — Compilation download</i>		13 Pgs.
210	Triode Operation of KT88s	R. M. Voss & R. Ellis	3 Pgs.
214	Pentode & Tetrode Operating Modes in Push-pull Outputs	Renato Tancino	5 Pgs.
215	High-Power Triode Amplifier	W. T. Selsted & R. H. Snyder	3 Pgs.
216	Pentodes & Tetrodes Operating as Triodes	C. C. McCallum	2 Pgs.

SECTION 5: CONSTANT-CURRENT OUTPUT STAGES — 4 ARTICLES

217	<i>Volume 1; Section 5 — Compilation download</i>		18 Pgs.
220	Constant-current Operation of Power Amplifiers	H. T. Sterling & A. Sobel	6 Pgs.
225	Constant-current Audio Power Amplifiers	H. T. Sterling & A. Sobel	4 Pgs.
226	Tube Applications in Amplifier Design	H. T. Sterling	6 Pgs.
230	Constant-current D-C Amplifier	Donald McDonald	2 Pgs.

SECTION 6: THE WILLIAMSON AMPLIFIER — 4 ARTICLES

231	<i>Volume 1; Section 6 — Compilation download</i>		52 Pgs.
235	Wireless World Williamson Amplifier Reprints	D. T. N. Williamson, et. al	43 Pgs.
239	Modernize Your Williamson Amplifier	David Hafler	3 Pgs.
240	Improving the Williamson Amplifier	Talbot M. Wright	3 Pgs.
241	The “Williamson Type” Amplifier Brought Up to Date	M. V. Kiebert	3 Pgs.

VOLUME 2: POWER AMPLIFIERS — CONTINUED

SECTION 7: MISC. CONSTRUCTORS’ POWER AMPLIFIERS & DESIGNS — 19 ARTICLES

242	<i>Volume 2; Section 7 — Compilation download</i>		217 Pgs.
243	Building the Williamson Amplifier	Herbert I. Keroes	3 Pgs.
245	Heathkit W-series Williamson Amplifier Assembly Manuals	Heathkit Co.	114 Pgs.
247	<i>Med-Power Tetrode Amplifier with Stabilized Screen Suppl</i>	Cullen H. MacPherson	2 Pgs.
248	McIntosh Unity-coupled Amp with Trifilar Output Xfrmr	Hugh A. Lockhart	29 Pgs.
250	<i>A Stable, High Quality Power Amplifie</i>	E. J. Miller	2 Pgs.
255	<i>Universal Feedback Amplifier Circui</i>	Arnold J. Kauder	3 Pgs.
260	<i>High-stability Feedback Amplifie</i>	Arnold J. Kauder	6 Pgs.
265	<i>The 88-50: A Low-distortion 50 Watt Amplifie</i>	W. I. Heath & G. R. Woodville	4 Pgs.
270	<i>A High Power Amplifier with Minimum Distortio</i>	Bruce DePalma	4 Pgs.
275	<i>60 Watt Amplifier with a Silicon Rectifier Power Supp</i>	L. B. Dalzell	4 Pgs.
280	<i>Another Power Amplifier</i>	R. A. Greiner	4 Pgs.
285	<i>An Amplifier for \$20.0</i>	Arnold J. Gassan	3 Pgs.
290	<i>Junior Golden Ear Amplifie</i>	Joseph Marshall	3 Pgs.
294	<i>The Musician’s Williamson</i>	D. Sarser & M. Sprinkle	4 Pgs.
295	<i>The Maestro: A POWER Amplifie</i>	D. Sarser & M. Sprinkle	4 Pgs.
300	<i>40 dB Feedback Audio Amplifie</i>	B. Drisko & R. Darrell	3 Pgs.
305	<i>Multiple-Feedback Audio Amplifie</i>	Joseph M. Diamond	2 Pgs.
310	<i>The White Powrtron Amplifie</i>	Stanley White	3 Pgs.
315	<i>Transformer Design for “Zero Impedance” Amplifier</i>	N. R. Grossner	5 Pgs.
320	<i>Zero-Impedance Output Stage</i>	Raymond G. Anthes	2 Pgs.

SECTION 8: OUTPUT TRANSFORMERLESS POWER AMPLIFIERS — 6 ARTICLES

321	<i>Volume 2; Section 8 — Compilation download</i>		32 Pgs.
325	<i>An Output-transformerless Amplifie -Speaker System</i>	Curtiss R. Schafer	4 Pgs.
330	<i>OTL Vacuum Tube Amplifie</i>	M. W. P. Strandberg	4 Pgs.
335	<i>Ultra-stable OTL Hi-Fi Amplifie</i>	Julius Futterman	5 Pgs.
340	<i>A New Transformerless Amplifier Circui</i>	Kerim Onder	4 Pgs.
345	<i>The OTL Amplifie</i>	V. Brociner & G. Shirley	4 Pg.
349	<i>An Output Transformerless Power Amplifier — Oct 1954</i>	Julius Futterman	5 Pgs.
350	<i>An Output Transformerless Power Amplifier — Oct 1956</i>	Julius Futterman	5 Pgs.
351	<i>Transformerless 25 Watt Amplifie</i>	The Radio Handbook	1 Pg.

SECTION 9: CATHODE FOLLOWER POWER-OUTPUT STAGES — 4 ARTICLES

352	<i>Volume 2; Section 9 — Compilation download</i>		13 Pgs.
355	<i>Cathode-Follower Loudspeaker Coupling</i>	E. W. Fletcher & S. F. Cooke	4 Pgs.
360	<i>The Cathode Follower Output Stage</i>	Robert M. Mitchell	3 Pgs.
365	<i>A Practical Cathode Follower Audio Amplifie</i>	W. E. Gilson & R. Pavlat	3 Pgs.
367	<i>The Cathode Follower as Audio Power Amplifie</i>	Howard T. Sterling	3 Pgs.
370	<i>Cathode Follower for HiFi — US Patent 1999</i>	Martin Reiffin	16 Pgs.

SECTION 10: ADVANCED THEORY & PRACTICE — 4 ARTICLES

371	<i>Volume 2; Section 10 — Compilation download</i>		32 Pgs.
374	<i>Use of an Ideal Output Transformer for Z Matching</i>	MIT — Dep't of Elect. Eng.	22 Pgs.
375	<i>A Multi-loop, Self-balancing Power Amplifier</i>	J. Ross Macdonald	17 Pgs.
380	<i>Graphical Determination of Performance of Push-pull Amps</i>	B. J. Thompson	10 Pgs.
385	<i>Class-A Push-pull Amplifier Theor</i>	Herbert L. Krauss	3 Pgs.
390	<i>Optimum Loading for Power Amplifie</i>	W. R. Ayres	2 Pgs.

SECTION 11: VARIABLE DAMPING, POSITIVE FEEDBACK & NEGATIVE IMPEDANCE — 14 ARTICLES

394	<i>Volume 2; Section 11 — Compilation download</i>		54 Pgs.
395	<i>Measuring Amplifier Damping Facto</i>	Author Unknown	1 Pg.
396	<i>Applying Variable Feedback</i>	Norman H. Crowhurst	3 Pgs.
397	<i>It's Positive Feedback</i>	Warner Clements	3 Pgs.
398	<i>Positive Current Feedback</i>	Ulrich Childs	3 Pgs.
399	<i>Balanced Feedback Amplifier</i>	Edward L. Ginzton	13 Pgs.
400	<i>Combining Positive & Negative Feedback in an AF Amplifie</i>	David Fidelman	4 Pgs.
401	<i>Amplifiers with Positive & Negative Feedbac</i>	Charles P. Boegli	6 Pgs.
402	<i>Combining Positive & Negative Feedback; and US Patent</i>	John M. Miller	4 Pgs.
403	<i>Damping Factor: A New Approach</i>	Fritz Langford-Smith	1 Pg.
405	<i>Variable Damping Factor Control</i>	Charles A. Wilkins	4 Pgs.
406	<i>Feedback Amplifiers; and U Patent</i>	C. A. Wilkins & H. W. Sullivan	5 Pgs.
410	<i>Variable Damping... How Good Is It?</i>	Norman H. Crowhurst	3 Pgs.
415	<i>Output Impedance Control</i>	Thomas Roddam	2 Pgs.
420	<i>Loudspeaker Damping with Dynamic Negative Feedback</i>	Ulric J. Childs	4 Pgs.
425	<i>What's All This About Damping?</i>	Norman H. Crowhurst	3 Pgs.

SECTION 12: SINGLE-ENDED PUSH-PULL POWER OUTPUT STAGES — 5 ARTICLES

426	<i>Volume 2; Section 12 — Compilation download</i>		27 Pgs.
430	“Single-ended” Push-pull Amplifier	Author/Publication Unknown	2 Pgs.
435	A Single-ended Push-pull Audio Amplifier	A. P. Peterson & D. B. Sinclair	5 Pgs.
436	A New Push-pull Amplifier Circuit	A. P. Peterson	8 Pgs.
440	Analyses of Drivers for Single-ended Push-pull Stage	Hiroshi Amemiya	6 Pgs.
445	Amp Circuit Having Series-connected Tubes — US Pat. 1953	Wallace Coulter	5 Pgs.

SECTION 13: CATHODE-BIASED POWER OUTPUT STAGES — 3 ARTICLES

444	<i>Volume 2; Section 13 — Compilation download</i>		8 Pgs.
445	<i>Improved Cathode Bias Circuit Affording Fixed Bias</i>	John A. Mulvey	1 Pg.
450	<i>The Low-loading Self-biased Amplifier</i>	L. B. Dalzell	3 Pgs.
455	<i>Effect of the Cathode Capacitor on Push-pull Output Stage</i>	Robert M. Mitchell	4 Pgs.

SECTION 14: MISC. RELEVANT ARTICLES — 26 ARTICLES

459	<i>Volume 2; Section 14 — Compilation download</i>		184 Pgs.
460	<i>Circuit Design Factors for Audio Amplifier</i>	M. V. Kiebert, Jr.	6 Pgs.
461	<i>New Amplifier has Bridge Circuit Output</i>	D. J. Tomick & A. M. Wiggins	3 Pgs.
462	<i>Circlotron Amplifier US Patent, March 1958</i>	Alpha. M. Wiggins	12 Pgs.
464	<i>Designing Your Own Amplifier: Parts 1 thru</i>	Norman H. Crowhurst	32 Pgs.
465	<i>Defects In Amplifier Performance</i>	Norman H. Crowhurst	9 Pgs.
470	<i>Transient Response of Audio Amplifier</i>	W. R. Ayres	2 Pgs.
475	<i>Causes of Low Outputs</i>	Author Unknown	1 Pg.
480	<i>“Circuit Sentry” Protects Tubes in P. A. Amplifier</i>	J. Levitsky	3 Pgs.
485	<i>Automatic Compensation for Class-B Operating Conditions</i>	Rockwell & Platts	6 Pgs.
490	<i>High Audio Power from Relatively Small Tubes</i>	E. Barton	21 Pgs.
495	<i>Recent Developments of Class-B Amplifier</i>	Loy E. Barton	22 Pgs.
496	<i>Vacuum Tubes Operated as Class-B and Class-C Amplifiers</i>	Bell System Technical Jour.	25 Pgs.
500	<i>A Stable Direct-coupled Amplifier</i>	G.R. Mezger	6 Pgs.
505	<i>Amplifiers of 15 to 30 watts and 50 to 100 Watts</i>	Author Unknown	12 Pgs.
525	<i>A 3000 Watt Audio Amplifier</i>	Alex B. Berskin	9 Pgs.
530	<i>High-Fidelity The Easy Way</i>	Comdr. W.B. Bernard, USN	4 Pgs.
535	<i>Extended Class-A Audio</i>	Howard T. Sterling	3 Pgs.
536	<i>Extended Class-A Amplifier</i>	Lloyd B. Hurst	4 Pgs.
540	<i>A 13-Watt All-Triode “Infinite Feedback” Amplifier</i>	Charles P. Boegli	3 Pgs.
545	<i>The Laboratory Golden Ear</i>	Joseph Marshall	6 Pgs.
550	<i>Gilding The Golden Ears</i>	Joseph Marshall	3 Pgs.
555	<i>High Fidelity Power Amplifier</i>	Joseph Marshall	4 Pgs.
565	<i>A 100 Watt Power Amplifier</i>	A. Kenneth Olson	4 Pgs.
570	<i>6DZ7 Amplifier</i>	Robert M. Voss	2 Pgs.

VOLUME 3: PUSH-PULL THEORY & PHASE SPLITTERS

SECTION 15: FUNDAMENTAL PHASE SPLITTER THEORY — 54 ARTICLES

584	<i>Volume 3; Section 15 — Compilation download</i>		1131 Pgs.
585	<i>Choosing The Phase Inverter: Parts 1 & 2</i>	Norman H Crowhurst	5 Pgs.
590	<i>An Analysis of the Split-load Phase Inverter</i>	George E. Jones Jr.	2 Pgs.
595	<i>In Defense of the Split-load Phase Inverter</i>	Daniel P. Peters	2 Pgs.
600	<i>Notes on the Cathodyne Phase Splitter</i>	Albert Preisman	2 Pgs.

605	<i>Concertina Phase Splitter: Parts 1 & 2</i>	<i>Author Unknown</i>	7 Pgs.
606	Valve Amplifying Circuit Improvements – UK & US Patents	Alan Dower Blumlein	11 Pgs.
610	<i>Push-pull Input Circuits: Parts 1 thru 5</i>	<i>W. T. Cocking</i>	21 Pgs.
631	<i>Push-pull Balance</i>	<i>W. T. Cocking</i>	4 Pgs.
632	<i>Phase Splitting in Push-pull Amplifier</i>	<i>W. T. Cocking</i>	5 Pgs.
635	Push-pull Drivers: Parts 1 thru 4	George F. Cooper	12 Pgs.
655	<i>Distortion & Phase Splitter Unbalance In Push-pull Amps.</i>	<i>Nathan O. Sokal</i>	2 Pgs.
665	<i>Understanding Common-mode Signals</i>	<i>R. N. Marsh</i>	7 Pgs.
670	<i>Balanced Amplifier</i>	<i>Franklin Offner</i>	5 Pgs.
675	<i>Push-pull Resistance-coupled Amplifier</i>	<i>Franklin Offner</i>	2 Pgs.
680	<i>Self-balancing Push-pull Circuits: Parts 1 & 2</i>	<i>D. R. Birt</i>	8 Pgs.
690	<i>Phase Inverters for Hi-Fi Amplifier</i>	<i>Mannie Horowitz</i>	3 Pgs.
695	<i>Cascode A.F. Amplifie</i>	<i>L. B. Hedge</i>	5 Pgs.
700	Balanced-output Amps of Highly Stable & Accurate Balance	EMI Laboratories	1 Pg.
705	<i>Balanced Amplifier Circuit</i>	<i>Author Unknown</i>	1 Pg.
710	<i>Electronic Circuitry</i>	<i>J. McSowerby</i>	3 Pgs.
715	<i>Analysis of Three Self-balancing Phase Inverters</i>	<i>Myron S. Wheeler</i>	4 Pgs.
720	<i>Directly Coupled Phase Inverter</i>	<i>E. Johnson</i>	1 Pg.
725	<i>Audio Patents</i>	<i>Richard H. Dorf</i>	2 Pgs.
730	<i>Direct Coupled Amplifier — US Patent 195</i>	<i>Edward J. Stachura</i>	5 Pgs.
731	<i>Push-pull Differential Amplifier — U Patent 1951</i>	<i>John E. Williams</i>	6 Pgs.
735	<i>Phase Splitters</i>	<i>Author Unknown</i>	1 Pg.
740	<i>Precision Phase Splitting</i>	<i>W. R. Ayres</i>	1 Pg.
745	<i>A Choke-coupled Phase-Inverter of High Accuracy</i>	<i>Seymour & Tucker</i>	2 Pgs.
749	<i>A Cross-coupled Input and Phase-inverter Circuit</i>	<i>J. N. van Scoyoc</i>	5 Pgs.
750	<i>Improving the Cross-coupled Inverter</i>	<i>Nicholas Pryor</i>	1 Pg.
755	<i>Simplified Cross-coupled Amplifi</i>	<i>Charles P. Boegli</i>	2 Pgs.
760	<i>Letters on Phase Splitters and Patent</i>	<i>Louis R. Bourget</i>	5 Pg.
765	New Phase-Splitter	A. R. Bailey	3 Pgs.
770	<i>Neutralizing Phase Splitters</i>	<i>W. T. Cocking</i>	1 Pg.
775	<i>The New “Isodyne” Phase Splitter</i>	<i>E. F. Worthen</i>	2 Pgs.
780	<i>Cathode-coupled Valves</i>	<i>T. W. Brady</i>	4 Pgs.
777	<i>Cathode Phase Inversion</i>	<i>O. H. Schmitt</i>	2 Pgs.
785	<i>Design of Cathode-coupled Amplifier</i>	<i>S. G. F. Ross</i>	4 Pgs.
790	<i>Cathode-coupled Amplifie</i>	<i>J. A. Lyddiard</i>	5 Pgs.
795	<i>The Cathode-coupled Amplifie</i>	<i>Keats A. Pullen Jr.</i>	4 Pgs.
800	An Improved Type of Differential Amplifier	J. S. C. Roberts	4 Pgs.
801	<i>A Differential Input Stage for Low-Frequency Amplifier</i>	<i>V. H. Atree</i>	2 Pgs.
805	<i>Cathode-coupled Push-pull Output Stage</i>	<i>Sturley & Bennent</i>	6 Pgs.
810	<i>Elements of Electronic Circuits</i>	<i>J. M. Peters</i>	2 Pgs.
815	<i>Cathode-coupled Amplifier Formula</i>	<i>Harry Stockman</i>	1 Pg.
820	<i>Electro-encephalograph Amplifier: Parts 1 thru</i>	<i>Denis L. Johnston</i>	25 Pgs.
830	<i>Equalizer-Amp: Transmitting Video over Phone Lines</i>	<i>Sewter & Wray</i>	8 Pgs.
845	<i>Special Amplifier Circuit</i>	<i>Herbert Ravenswood</i>	3 Pgs.
846	<i>Balanced Circuit for Radio Apparatus US Patent</i>	<i>Nelson B. Thiarp</i>	5 Pgs.
847	<i>Balanced Direct- and Alternating Current Amps US Patent</i>	<i>Maurice Artzt</i>	6 Pgs.

VOLUME 4: VOLTAGE AMPLIFIERS

SECTION 16: TRIODE VOLTAGE-AMPLIFIER THEORY — 8 ARTICLES

849	<i>Volume 4; Section 16 — Compilation download</i>		62 Pgs.
850	<i>Design Principles of Single-ended Triode Amplifier</i>	<i>Valley & Wallman</i>	36 Pgs.
855	<i>Low Frequency Amplification: Parts 1 thru</i>	<i>K. R. Sturley</i>	26 Pgs.

SECTION 17: NOISE IN LOW-LEVEL INPUT STAGES — 15 ARTICLES

856	<i>Volume 4; Section 17 — Compilation download</i>		150 Pgs.
857	<i>Thermal Agitation of Electric Charge in Conductors</i>	H. Nyquist	4 Pgs.
858	<i>Thermal Agitation of Electricity in Conductors</i>	J. B. Johnson	13 Pgs.
859	<i>Limits to Amplification</i>	J. B. Johnson & F. Llewellyn	12 Pgs.
860	<i>Audio Frequency Input Circuits</i>	William B. Snow	8 Pgs.
861	<i>A Note on Noise in Audio Amplifier</i>	Woll & Putzrath	4 Pgs.
862	<i>Design of a Preamp for Low-level Inputs</i>	Martin V. Kiebert, Jr.	7 Pgs.
863	<i>Noise: Explaining Its Nature and Origin</i>	“Cathode Ray”	4 Pgs.
864	<i>Noise: Practical Effects</i>	“Cathode Ray”	5 Pgs.
865	<i>A Study of the Characteristics of Noise</i>	V. D. Landon	8 Pgs.
866	<i>Some Notes on Noise Figures</i>	Harold Goldberg	10 Pgs.
867	<i>Shot Noise</i>	Radiotron Designers H’book	2 Pgs.
868	<i>Induced Grid Noise</i>	Radiotron Designers H’book	1 Pg.
869	<i>A Study of Noise in Vacuum Tubes and Attached Circuits</i>	F. B. Llewellyn	23 Pgs.
870	<i>Thermal Noise In a Parallel RC Circuit</i>	C. J. Merchant	3 Pgs.
871	<i>Characteristics and Origins of Noise</i>	W. R. Bennett	7 Pgs.
872	<i>Noise in Electrical Circuits</i>	F. N. H. Robinson	33 Pgs.
873	<i>Induced Grid Noise and Noise Factor</i>	R. L. Bell	5 Pgs.

SECTION 18: CASCODE VOLTAGE AMPLIFIERS — 9 ARTICLES

874	<i>Volume 4; Section 18 — Compilation download</i>		63 Pgs.
875	<i>Operating Cascodes and Selecting Tubes for Audio Cascodes</i>	Brian Clark	1 Pg.
880	<i>Cascode Audio Amplifier has Low Noise Leve</i>	R. Lee Price	2 Pgs.
885	<i>A New Approach to Professional Magnetic Recording Equip</i>	Boylan & Goldstandt	9 Pgs.
890	<i>The Cascode as a Low Noise Audio Amplifie</i>	Lee Price	5 Pgs.
895	<i>Cascode Preamp Improves Signal-to-Noise Ratio</i>	M. V. Kiebert	6 Pgs.
900	<i>A Cascode Amplifier Degenerative Stabilize</i>	V. H. Attree	5 Pgs.
905	<i>A Cascode Amplifier for Phono Preamp</i>	Joseph Marshall	4 Pgs.
910	<i>A Low-Noise Amplifie</i>	Wallman, Macnee & Gadsden	9 Pgs.
915	<i>Electronic Circuitry</i>	J. Sowerby	4 Pgs.
916	<i>NIST (NBS) Ultra-low Noise JFET Cascode Amplifier</i>	NIST	6 Pgs.
917	<i>Ultra-low Noise Cascode Amplifier Design</i>	Vovtêch Janásek	7 Pgs.
918	<i>Ultra-linear Cascode — US Patent</i>	William Z. Johnson	5 Pgs.

SECTION 19: CATHODE FOLLOWERS — 22 ARTICLES

917	<i>Volume 4; Section 19 — Compilation download</i>		83 Pgs.
918	<i>The Cathode Follower—What It Is and What It Does</i>	“Cathode Ray”	4 Pgs.
919	<i>Cathode Followers and Their Grid Bias Arrangements</i>	“Cathode Ray”	5 Pg.
920	<i>Cathode Follower Nomographs — Parts 1 thru 3</i>	Melvin B. Kline	3 Pgs.
935	<i>Cathode-Follower Nomogram</i>	A. L. Teubner	1 Pg.

3695 <i>Realistic High Fidelity: Horn Loudspeakers and Enclosures</i>	<i>H. A. Hartley</i>	4 Pgs.
3700 <i>Realistic High Fidelity: The Power that Drives the Speakers</i>	<i>H. A. Hartley</i>	5 Pgs.
3705 <i>Realistic High Fidelity: Audio Output Tubes and Circuits</i>	<i>H. A. Hartley</i>	5 Pgs.

3710	<i>Transmitting the "Auditory Perspective" in Music</i>	<i>Electronics, May, 1933</i>	3 Pgs.
3715	<i>Enhanced Stereophonic Recordings from Bell Labs</i>	<i>Bell System Technical Jour.</i>	2 Pgs.
3720	<i>Behind the Scenes: Ampex Tape Machines</i>	<i>Bert Whyte</i>	2 Pgs.

VOLUME 14: MISCELLANEOUS TOPICS — CONTINUED

SECTION 44: IMPEDANCE-MATCHING THEORY — 12 ARTICLES

3724	<i>Volume 14; Section 44 — Compilation download</i>		36 Pgs.
3725	<i>More About Filters</i>	<i>Norman H. Crowhurst</i>	4 Pgs.
3730	<i>Impedance Matching in Audio Circuits</i>	<i>Joel H Levitt</i>	1 Pg.
3735	<i>Transistor Impedance Matching</i>	<i>Paul Williams</i>	1 Pg.
3740	<i>Impedance: Matched or Optimum</i>	<i>William B. Snow</i>	5 Pgs.
3745	<i>Load or Burden</i>	<i>"Cathode Ray"</i>	2 Pgs.
3750	<i>Mismatch Between Power Amps and Loudspeaker Loads</i>	<i>D. R. von Recklinghausen</i>	4 Pgs.
3755	<i>Optimum Loading for Power Amplifier</i>	<i>W. R. Ayres</i>	2 Pgs.
3760	<i>Output Stage and Loud Speaker</i>	<i>Fritz Langford-Smith</i>	8 Pgs.
3765	<i>More About Mismatching</i>	<i>Robert M. Mitchell</i>	2 Pgs.
3770	<i>Graphical Solution of Electrical Network Impedances</i>	<i>L. U. Hamvas</i>	4 Pgs.
3775	<i>What is Optimum Load?</i>	<i>Norman H. Crowhurst</i>	2 Pgs.
3780	<i>Why Match Impedances?</i>	<i>Paul Penfield, J.</i>	3 Pgs.

SECTION 45: MICROPHONES, ANECHOIC, STUDIO & PLAYBACK ENVIRONMENTS — 13 ARTICLES

3784	<i>Volume 14; Section 45 — Compilation download</i>		62 Pgs.
3785	<i>The AF Anechoic Chambers Cherry Hill</i>	<i>Corrington, Libbey & Perry</i>	6 Pgs.
3886	<i>Anechoic Rooms: Design and Use</i>	<i>Author Unknown</i>	5 Pgs.
3790	<i>Orchestral Studio Design</i>	<i>T. Somerville</i>	4 Pgs.
3795	<i>Studio Acoustics</i>	<i>Author Unknown</i>	1 Pg.
3800	<i>Recording Studio Design</i>	<i>P. A. Shears</i>	6 Pgs.
3805	<i>Acoustic Response Curves</i>	<i>E. W. Rogers</i>	3 Pgs.
3810	<i>The Environment of High-Quality Reproduction</i>	<i>F. H. Brittain</i>	4 Pgs.
3820	<i>dB Theory and Practice</i>	<i>Norman H. Crowhurst</i>	3 Pgs.
3825	<i>Broadening the Stereo Seat</i>	<i>Author Unknown</i>	5 Pgs.
3830	<i>The Loudspeaker in the Home</i>	<i>P. J. Walker</i>	4 Pgs.
3835	<i>Corner Speaker Placement</i>	<i>Paul W Klipsch</i>	5 Pgs.
3845	<i>New Microphone Has Unique Directivity</i>	<i>Harold S Mawby</i>	7 Pgs.
3846	<i>New High Grade Condenser Microphones</i>	<i>F. W. O. Bauch</i>	9 Pgs.

SECTION 46: LPS, TURNTABLES & TONEARMS — 27 ARTICLES

3849	<i>Volume 14; Section 46 — Compilation download</i>		132 Pgs.
3850	<i>Understanding Phono Cartridges</i>	<i>S. K. Pramanik</i>	6 Pgs.
3855	<i>Turntables and Noise</i>	<i>Joseph F Grado</i>	4 Pgs.
3860	<i>Dynamic Range Requirements of Phono Preamp</i>	<i>Tomlinson Holman</i>	7 Pgs.
3865	<i>Measuring Turntable Speed Fluctuations</i>	<i>E. W. Berth-Jones</i>	3 Pgs.
3870	<i>The Columbia LP Microgroove Recording System</i>	<i>Goldmark & Snepvangers</i>	5 Pgs.
3875	<i>Tracking Distortion as Phase Modulation</i>	<i>Duane H. Cooper</i>	6 Pgs.
3880	<i>Vertical Tracking Problem in Stereo Record Reproduction</i>	<i>Benjamin B. Bauer</i>	9 Pgs.
3885	<i>A Study of Tracking-Angle Errors in Record Recording</i>	<i>Woodward & Fox</i>	7 Pgs.
3890	<i>An Improvement in Simulated Three-Channel Stereo</i>	<i>Peter W Tappan</i>	8 Pgs.

3895	<i>Mastering onto 35-mm Sprocket-Type Magnetic Film</i>	Frayne & Stafford	5 Pgs.
3900	<i>Records in the Making</i>	Author Unknown	2 Pgs.
3905	<i>Technique of Record Processing</i>	Lewis S. Goodfriend	4 Pgs.
3910	<i>Playback Response Curves</i>	Author Unknown	1 Pg.
3915	<i>Design of LP Records</i>	Author Unknown	2 Pgs.
3920	<i>Overcoming Record Warp & LF Turntable Rumble</i>	Clunis & Kelly	9 Pgs.
3925	<i>Tracking Behavior of Pickup Arm Cartridge Systems</i>	James M. Kates	5 Pgs.
3930	<i>Choosing a Phono Pickup</i>	Norman H. Crowhurst	5 Pgs.
3935	<i>Complete Remote Control of an Ampex 300</i>	Richard F. Blinzler	2 Pgs.
3940	<i>Equalization in Tape Recorders</i>	Herman Burstein	4 Pgs.

4176	<i>Seduced by the Pure Music of Virgin Commies</i>	Discover: May 1987	7 Pgs.

SECTION 50: CLASSIC AM RADIOS - 7 ARTICLES

4179	<i>Volume 15; Section 50 — Compilation download</i>		35 Pgs.
4180	<i>Scott Hi-Fidelity All-wave Superhet</i>	Author Unknown	4 Pgs.
4185	<i>Scott "Phantom"</i>	Author Unknown	3 Pgs.
4190	<i>McMurdo Silver</i>	Author Unknown	5 Pgs.
4195	<i>Silver Ghosts</i>	J. W. F. Puett	5 Pgs.
4100	<i>The Scott Allwave Fifteen Receiver</i>	Author Unknown	4 Pgs.
4105	<i>13-550 Meter "Superhet"</i>	S. Gordon Taylor	2 Pgs.
4110	<i>Scott Radio</i>	Author Unknown	12 Pgs.

VOLUME 16: TEXTBOOKS, SEMINAL ARTICLES AND PERIODICALS OF THE ERA

SECTION 51: CLASSIC TEXTS — 12 TEXTBOOKS, 1 ARTICLE — ALL ARE OCR-D

4390	<i>Volume 16; Section 50 — Compilation download</i>		
4391	<i>Vacuum Tube Electronics — Reviews of the Major Texts</i>	Scott Frankland	32 Pgs.
4395	<i>Radiotron Designers' Handbook — 4th Edition</i>	F. Langford-Smith, et al.	1,400 Pgs.
4400	<i>Radio Engineering — 2nd Edition</i>	F. E. Terman	827 Pgs.
4401	<i>Electronic Measurements — 2nd Edition</i>	F. E. Terman & J. M. Pettit	720 Pgs.
4405	<i>Electronic Engineering — 2nd Edition</i>	C. L. Alley & K. W. Atwood	761 Pgs.
4410	<i>Graphical Constructions for Vacuum Tube Circuits</i>	Albert Preisman	245 Pgs.
4415	<i>Vacuum Tube Amps— Vol. 18: MIT Radiation Lab Series</i>	G. Valley Jr. & H. Wallman	761 Pgs.
4420	<i>The Art of Electronics — 2nd Edition</i>	P. Horowitz & W. Hill	1,042 Pgs.
4425	<i>Amplifiers: The Why & How of Good Amplification</i>	G. A. Briggs & H. H. Garner	213 Pgs.
4430	<i>Basic Audio — Volumes 1 thru 3</i>	Norman H. Crowhurst	401 Pgs.
4435	<i>Getting the Most Out of Vacuum Tubes</i>	Robert B. (Bud) Tomer	172 Pgs.
4440	<i>Low-noise Electronic System Design</i>	Mothcembacher & Connelly	446 Pgs.
4445	<i>Acoustical Engineering — 3rd Edition</i>	Harry F. Olson, Ph. D.	737 Pgs.
4450	<i>Why You Hear What You Hear — Open Source Portion Only</i>	Eric Heller	254 Pgs.
4455	<i>Electronic Transformers and Circuits — 2nd Edition</i>	Ruben Lee	378 Pgs.
